

Aliyah Zaizay

267-680-4608 aliyahkzaizay@gmail.com linkedin.com/in/aliyah-zaizay github.com/aliyahkzaizay

Education

Rensselaer Polytechnic Institute (RPI)

Expected May 2027

Bachelor of Science in Computer Science; Minor in Graphic Design

Troy, NY

- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, Programming Languages, Principles of Software
- **Fall Coursework:** Cloud Computing, Software Design & Documentation

Technical Skills

Languages: Python, JavaScript, Java, C++

Frontend: React, React Native, Tailwind CSS

Backend & Data: Node.js, FastAPI, DynamoDB, REST APIs, Pydantic

AI & Developer Tools: Claude Code, LangGraph, LangChain, AWS Bedrock

Cloud & DevOps: AWS (Lambda, S3, CloudWatch), Terraform, Docker, Git, GitHub Actions, CI/CD, Bash

Work Experience

Avahi

May 2026 – Present

Software Development Intern

Remote

- Built the business-context extraction agent for an AI-assisted pipeline that recommends AWS services and estimates monthly cloud costs; defined its schema and wiring to transform SOWs into structured context for downstream agents.
- Prevented legacy gp2 EBS recommendations through prompt constraints, a second-pass validator, and Gate 2 findings that solutions architects can confirm or override, helping avoid up to **20%** storage-cost inflation on affected line items.
- Added SOW-alignment sorting and ranking to the use-case identifier and designed the Gate 1 human-in-the-loop review flow, prioritizing research around each customer's stated objectives.
- Improved Lambda reliability with iteration caps, concurrency controls, and bounded timeouts; used CloudWatch Live Tail to trace and resolve pipeline failures.
- Migrated PMO agent workflows into Avahi's internal platform by developing frontend interfaces and backend integrations for the agents.
- Currently building a Slack-command pipeline that generates structured Win Wire reports for AWS, using Claude Code to accelerate implementation and debugging.

America Reads and Counts

Sept 2023 – Dec 2025

Tutor (Work Study)

Troy, NY

- Provide individualized academic support to K–12 students, strengthening communication and problem-solving across diverse student needs.

Rensselaer Pipelines Initiatives

May 2025 – Aug 2025

Teaching Assistant

Troy, NY

- Taught Java fundamentals and provided technical mentorship and debugging support in a project-based engineering program.

Projects

C.E.O. Dashboard | *React, Node.js, Python*

2026 – Present

- Developing a full-stack club operations platform that centralizes attendance and member data for student organization leaders.
- Designing backend services and data models for members, events, and attendance, plus a Python pipeline that synchronizes Google Sheets check-ins through an API.
- Building React analytics for attendance trends, event performance, and active-member identification with authentication and organization management features.

RPIDorms | *React, JavaScript, Leaflet, JSON*

Jan 2025 – Dec 2025

- Developed a responsive map with search and filtering to improve dorm discovery by location and class year.
- Contributed reusable product features to an open-source housing platform serving **1,000+ students** through collaborative code reviews and Git-based workflows.

NSH @ RPI 2027 Website | *React, JavaScript, Netlify*

2026 – Present

- Built and deployed a responsive event website that centralizes schedules, rules, registration information, and participant resources.
- Collaborate with NSBE and SHPE organizers to translate evolving event requirements into clear, maintainable web content.

Leadership

Black Student Association | RPI Chapter

July 2025 – Present

President

Troy, NY

- Lead organization operations and communications for the 2026–27 school year after serving as Public Relations Chair.

National Society of Black Engineers | NSBE-RPI

April 2026 – Present

Hackathon Director, NSH @ RPI 2027

Troy, NY

- Direct planning, sponsor outreach, and logistics for a 100+ participant hackathon with **\$9,000** in confirmed funding.
